

MV Index Solutions Launches the MVIS Global Clean-Tech Metals ex-China Index and the BlueStar Top 10 US Residential Real Estate Index

Frankfurt (28 January 2022) - [MV Index Solutions GmbH \(MVIS[®]\)](#) today announced the launch of the [MVIS Global Clean-Tech Metals ex-China Index \(ticker: MVGMXC\)](#) and the [BlueStar Top 10 US Residential Real Estate Index \(ticker: BURRT\)](#).

The [MVIS Global Clean-Tech Metals ex-China Index \(ticker: MVGMXC\)](#) tracks the performance of global metals and rare earth element miners, refiners, and recyclers focused on metals and elements that are used in technologies contributing to the proliferation of clean energy. The index includes companies that generate at least 50% of their revenue from clean-tech metals or that have ongoing mining projects that have the potential to generate at least 50% of the company's revenue from clean-tech metals.

"We are happy there is more demand for this topic after the launch of our MVIS Global Clean-Tech Metals index last year, which also includes locally-traded Chinese companies," said Thomas Kettner, COO of MV Index Solutions. "The new index is based on the same universe – excluding China - and selection rules, so the absence of locally traded Chinese stocks leads to the addition of smaller, global companies," he continued.

The [BlueStar Top 10 US Residential Real Estate Index \(ticker: BURRT\)](#) tracks the performance of the 10 largest and most liquid US exchange-listed residential real estate companies. This is an equally weighted index, and only includes companies that are domiciled, incorporated or headquartered in the United States, listed on a US exchange and denominated in USD. The index includes companies that generate at least 50% of their revenue or real estate asset value from residential real estate located in the US.

"We are pleased to announce the launch of our US Residential Real Estate Index, which provides investors a unique mix of REITs and home builders operating in the US. Housing supply pressures and

an inflationary environment could provide tailwind to this sector over the coming years,” said Josh Kaplan, Global Head of Research & Investment Strategy at MV Index Solutions.

The [MVIS Global Clean-Tech Metals ex-China Index \(ticker: MVGMXC\)](#) and the [BlueStar Top 10 US Residential Real Estate Index \(ticker: BURRT\)](#) are weighted by free float market capitalisation and are calculated in USD as price indices and total return net indices. The [MVIS Global Clean-Tech Metals ex-China Index \(ticker: MVGMXC\)](#) is reviewed on a quarterly basis. The [BlueStar Top 10 US Residential Real Estate Index \(ticker: BURRT\)](#) is reviewed on a semi-annual basis. Capping factors are applied to avoid overweighting of single index components. Detailed information about the index, including methodology details and index data, is available on the [MV Index Solutions website](#).
